

LCAA Airbag

Hey Everyone.

In case you forgot this Saturday July 30th is the Banshee Reeks Ghost Walk!!!

I know you don't want to miss that but just in case we can tare you away LCAA is hosting our 2nd NIGHT FLIGHT!!!!

⇒ ***Flying starts after 8 AM for Electric aircraft and 9 AM for Gas/Nitro aircraft.***

⇒ ***Flying ends at 8PM for Gas/Nitro aircraft and 11 PM for electric aircraft. Unless we get tired and want to go home to bed earlier.***

There has been lots of talk on the Slack Night Flight Channel so even if you aren't flying, come by to check it all out.

As always remember to leave the front park gate as you find it when entering or exiting the preserve.

Last word:

Our own Mike Gragg found an article on the possibility of using Dynamic Soaring on Mars with sailplanes with no motors so, thinking club members might be interested he wrote the attached brief article on Dynamic Soaring which also includes the link to flying on Mars.
