Finishing Materials

Paints: Comments:

Nitrate dope fast dry, high odor, low shrink, not fuel proof, harder to find in

colors, light weight, medium to high gloss

Butyrate dope fast dry, high odor, high shrink, moderate fuel proof, expensive,

medium to high gloss, available from Sig, Randolph

Polytone fast dry, high odor, low shrink, fuel proof, expensive, available

from Stits, F&M Enterprises, medium gloss

Epoxies moderate cure times, low or high odor types available, now shrink,

very expensive, very fuel proof, requires NIOSH approved respirator,

tend to be heavier, high gloss or satin hardeners available

Lacquers fast dry, high odor, moderate shrink, not fuel proof, available as

Lustrekote, Krylon, Krylon Fusion (for plastic), high gloss or flats

Enamels medium to long drying time, medium odor, not fuel proof,

available in spray cans, high gloss or flats

Polyuethanes medium to long dry time, medium odor, moderately fuel proof,

may be catalyzed for best fuel proofing but this requires NIOSH

respirator and often protective clothing, expensive

Acrylics low odor, quick drying, moderately fuel proof, some adhere well

to film coverings, lower cost, semi-gloss, Pactra RC Acryl, water

clean up when wet

Latex low odor, moderate dry time, not fuel proof, inexpensive, water

clean up when wet, available in spray cans from Krylon

Trim Materials:

Monokote Trim Sheet adhesive backed, gloss colors, aggressive adhesive, can be applied

with Windex to allow positioning, hand cut with sharp blade

Vinyl Sheet adhesive backed, gloss and semi-gloss colors, aggressive adhesive,

available in wide rolls form Sign Warehouse, conforms to slight irregularities, hand cut with sharp blade, custom graphics from Callie Graphics, clean surface before applying for best adhesion

Trim Stripe adhesive backed, may have UV curable adhesive, good for covering

seams, vinyls such as PROSTRIPE can follow very tight curves better than polyesters such as Hanger 9, clean surface to apply

Masking Tapes:

3M Low Tack Painters Tape good release properties, good edge quality, moderate cost,

moderate stretch around curves, test before using

Fine Line Tape best edge quality, moderate release, higher cost, narrow widths

moderate stretch around curves, test before using
